

Ashton Medical Centre

Speakman Construction

Access scaffold
Support scaffold
Roof scaffold
Façade scaffold
Demolition scaffold

Design & subsequent erection of a temporary roof protection scaffold system was required so that Speakmans Construction could install and erect a new 1st floor storey to this single storey building, whilst it remained open.

The main challenges of this particular project included:

- Temporary road closure to Glebe Street in Ashton.
- Maintain a rear access to the property.
- Maintain three front accesses to the property.
- Use of profiled metal sheets to prevent access to the scaffold and entry into the premises.
- Cantilevered beam constructed scaffold due to the adjoining low level roofs.

Due to the building remaining open the scaffolding needed to be initially erected out of hours with the provision of a protective walkway. This then allowed further scaffold to be erected during normal hours.

Bolton Scaffolding, safely bringing everything within reach.
