

# Georgia Pacific (UK) Limited

## Stubbins Mill, Ramsbottom

- Access scaffold
- Support scaffold
- Roof scaffold
- Façade scaffold
- Demolition scaffold

Scaffolding was required for the introduction of new machinery to the first floor of an existing building.

A free standing, structural scaffolding was designed and constructed.

The structural scaffold was erected and dismantled within a 1 week period to allow for new machinery to be installed into the site. The machine was craned onto the scaffold and then rolled into place within the building.

This method was seen to be the most cost effective the best Health & Safety solution for this machine installation.

Bolton Scaffolding, safely bringing everything within reach.
